WhatsApp AI Bot using Gemini

ok URL for WhatsApp and input it into the [Device Setting](#)..don't forget to activate "Get Incoming Message" & "Get webhook".

Get your Gemini API Key at the address below.

[gemini.com](#)

Copy into your webhook. Change the \$api_key to your API key.

Use the model **gemini-1.5-pro**. This model might become obsolete; please always check for new models in the documentation on Google.
